Career Objective

Final-year master's student in civil engineering with a passion for climate risk and sustainable infrastructure. I hope to build infrastructure that keeps communities safe as our climate changes.

Education

Master of Professional Engineering (Civil Engineering) Feb 2025- Present

University of Technology Sydney (UTS)

- Achieved High Distinction first & third semester| GPA: 6.92, WAM: 89.50 .

Bachelor of Civil Engineering Jan 2019 - Mar 2024

Khulna University of Engineering & Technology

- Distinction average 79%| CGPA: 3.64/4.00
- University Technical Scholarship; placed in the class's top half for the last three consecutive years.
- Dean's award for achieving high distinction (GPA 3.79) in 4th year.

Technical Skills

Design AutoCAD, ETABS, SewerGEMS, GeNIE, QGIS, CIRCLY 7.0, ArcGIS

Other Software MS Word, Excel, and PowerPoint

Work Experience

Engineering Intern May 2026 – Present

Optik Consultancy

- Led a 6-person team on a live consulting project with Tweed Shire Council, delivering asset risk rankings for sea level rise under multiple climate scenarios (2040–2120).
- Forecasted tidal inundation risk to council infrastructure, turning climate data into actionable insights for long-term planning.
- Managed team delivery and stakeholder communication, delegating tasks based on individual strengths and presenting weekly project updates to supervisors and council stakeholders under real client deadlines.

Notetaker Jan 2026 – Present

Student Service Unit, UTS

- Produced accurate lecture notes in MS Word, demonstrating attention to detail, confidentiality and professional written communication.

Crew Member August 2025- Present

GYG Food Chain, Circular Quay

- Provided efficient customer service in high-paced environments, building communication and composure under pressure.

Leadership and Professional Development

Peer Network, UTS July 2025- Present

- Coordinated orientation activities and engaged with diverse student groups, developing interpersonal and team skills with strong communication abilities.

- Led hospitality initiatives for international students, showcasing cultural sensitivity and adaptability.

Postgraduate Collective, UTS

Mar 2025

- Assisted in organising a postgraduate social event, handling logistics and purchases to ensure smooth operations, demonstrating planning and coordination abilities.

Concrete Society of KUET, Bangladesh

Mar 2023- Dec 2024

- Mentored new members and facilitated training sessions, developing hands-on leadership and teamwork abilities.
- Organised student events and managed finances accurately, showing planning and record-keeping abilities.

Academic & Research Projects

Quantitative Risk Assessment and Decision-Making

May 2026

Graduate Research Project

- Reviewed how recycled steel slag and reclaimed asphalt can reduce carbon emissions and urban heat in Australian roads.
- Analysed environmental and cost data from published studies using Life Cycle Assessment (LCA) and Life Cycle Cost Analysis (LCCA) methods.
- Built a combined cost-benefit framework and found that these recycled materials can cut emissions by ~20% and surface heat by up to 13%.

Sustainable Energy System Design

May 2025

Course: Designing Sustainable Engineering Projects

- Collaborated in a team to design a solar PV, battery storage, and grid-connected energy system for a rural property to meet 9200 kWh annual demand.
- Led CBA and LCA across competing technologies (Li-ion, Na-ion, biomass, EV) and selected an agrivoltaics solar layout projecting \$5336 net savings over 10 years and 12% annual CO₂ reduction.

Transferable Skills

- **Teamwork:** Achieved a high distinction team project designing a full agrovoltaics energy system with quantified cost and emissions outcomes, recognised by peers and academics for collaborative contribution.
- **Problem-solving:** Delivered creative, data-driven solutions across structural, energy and risk projects using AutoCAD, ETABS and GeNIe.
- **Adaptability & Communication:** Navigated cultural transition as an international student while supporting incoming students as a UTS Peer Networker, developing strong communication skills.
- **Other Languages:** Fluent in Bengali and Hindi.

Extra-Curricular Activities

UTS BUILD Program

Oct 2025

- Developed foundational skills in global leadership, ethical decision-making, and cross-cultural communication.

UTS Soul Badge

Aug 2025

- Volunteered for not-for-profit organisations to deliver measurable community benefit through a social impact actionable program.

Referees

Available upon request.
